SUMMARY

I am an aspiring developer and fresh graduate IT student passionate about web development, API integration, and building systems that solve real-world problems. With a strong foundation in full-stack development, I'm committed to continuous learning and creating innovative solutions. I thrive in collaborative environments and enjoy tackling complex technical challenges.

TECHNICAL SKILLS

- Full Stack Web Development, Mobile App Development, Software Quality Assurance
- Basic IT Troubleshooting, Multimedia (Basic Video Editing), Digital Marketing
- Programming Language: Html, Css, Javascript, PHP, TypeScript, Python, Java
- Frameworks: Laravel, React, React Native, NodeJs, Express, Flutter
- Database : Sqlite, MySql, NoSql, PostgreSQL
- Tools: Vscode, Git, Github, MongoDB, Xampp, Figma, Microsoft Excel, Da Vinci

EDUCATION

Bukidnon State University

Bachelor of Science in Information Technology

Fortict St. Malaybalay City, Bukidnon

Aug 2022 - June 2026

EXPERIENCE

Logicbase Interactive Ent. - Intern

Web and Mobile Developer

Pabayo-Hayes St. Cagayan De Oro City

Feb 10, 2026 - May 8, 2026t

- Developed and maintained web, mobile and windows system modules using Laravel, PHP, React, React Native TypeScript, Flutter and MySQL.
- Assisted in implementing CRUD operations, API integration, authentication features, and database management functionalities.
- Conducted testing, debugging, and system enhancements to improve application performance and user experience.

PROJECTS

FakeGuard: A Machine Learning Approach For Detecting Fakenews (Capstone)

BERT Model, Python (Flask), Laravel

- Developed a web-based fake news detection system that utilizes a fine-tuned BERT model and Natural Language Processing (NLP) techniques to classify news articles as real or fake.
- Integrated a Python Flask backend with a Laravel web application to provide real-time machine learning predictions and probability scores.
- Achieved over 95% classification accuracy using a BERT-based machine learning model for fake news detection.

TrackWise: Financial Tracker Application

React Native, Laravel, MySQL

- Developed a mobile financial tracking application that helps users monitor income, expenses, and overall spending habits through an intuitive interface.
- Implemented secure user authentication, expenses management, and data storage using Laravel and MySQL.
- Designed responsive dashboards and financial summaries to provide users with clear insights into their budgeting and financial activities.

CERTIFICATES & TRAININGS

- Academic Mentoring Program (C programming)
- ASEAN DATA Science Explorers 2023
- Virtual Natural Language Processing Training Workshops and BOSESKO Data Collection
- Certificate of Completion of Internship
- CCNA: Introduction to Cybersecurity
- CCNA: Enterprise Networking, Security, and Automation
